LEATHERBACK ORIENTAL FUND (A)

MINIMUM DISCLOSURE DOCUMENT

31 March 2025

INVESTMENT OBJECTIVE

The Leatherback Oriental Fund is a worldwide portfolio that aims to deliver a moderate to high long-term total return through global investments and outperform the benchmark on a risk-adjusted basis.

INVESTMENT UNIVERSE

In order to achieve its objective, the investments to be included in the portfolio may consist of a combination of assets in liquid form, money market instruments, interest bearing securities, bonds, debentures, corporate debt, equity securities, property securities, preference shares, convertible equities and non-equity securities. The manager may invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective investment schemes as the Act may allow from time to time, and which are consistent with the portfolio´s investment policy.

The Fund is a global fund with a flexible mandate to invest in a combination of liquid securities, money market instruments, interest bearing securities, bonds, debentures, equity securities, property securities, preference shares and convertible equities. The Fund is actively managed and follows a market orientated investment approach towards equity valuation.

DISTRIBUTIONS*

The Fund is known as a Roll-Up Fund, meaning that income generated by the fund (such as dividends, interest or capital gains) is not distributed to the clients.

PORTFOLIO CHARACTERISTICS

The Oriental Belt encompass all countries ranging from 60˚ to 180 ˚ EAST of the Greenwich Meridian, i.e., Asia & Oceania.

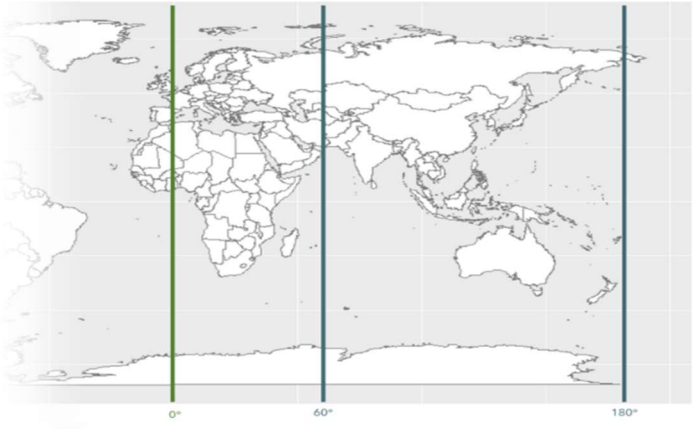

The Fund will invest in listed securities of entities

- which earn more than 75% of its revenue in the Oriental Belt or
- with its primary security listed in a country in the Oriental Belt.

The Fund will not invest in any UN sanctioned jurisdictions. It will also exclude any investments in tobacco, farming of palm oil and fisheries, gambling, and the manufacturing of nuclear weapons.

WHO SHOULD CONSIDER INVESTING?

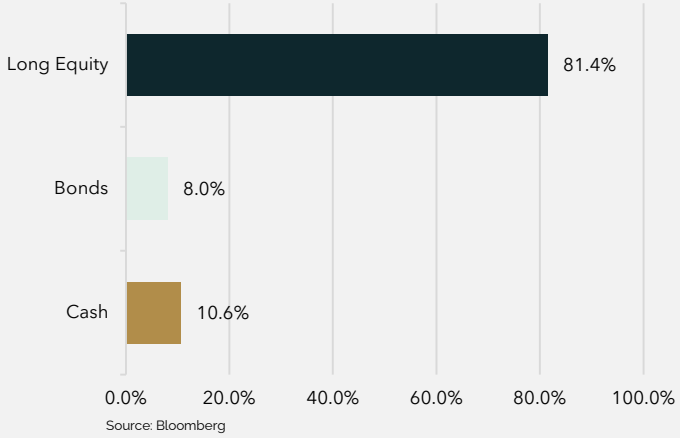

Investors who want to use the Fund as part of their worldwide exposure and who are comfortable with exposure to shares in the Oriental region as per the description of the Fund. Investors should also be willing to accept that the Fund may underperform the benchmark significantly in the short-term for the pursuit of superior long-term gains.

PORTFOLIO MANAGER COMMENT

Emerging Market (EM) equities continued to outperform the Developed Market peers in March 2025, with a strong performance from Hong Kong and India. The Emerging Market Index was up 2,41% in March vs the S&P500 down 6,2% and the Developed Market Index down 4,28%.

A. China

For Chinese stocks to outperform American ones is rare enough.

Year to date the MSCI China index has beaten its American equivalent by an impressive 10 percentage points, on the back of excitement about cutting-edge tech firms such as DeepSeek and Manus AI. American shares, meanwhile, have been weighed down by worries about a bellicose Trump administration and the danger of a slowing economy.

Could this revival be enough to entice international investors back to China? It has been a rocky romance so far. When outsiders looked at China's vast economy and rapid growth in the early 2010s, many saw a land of endless opportunity. More recently, however, slowing growth and a government crackdown on private firms, ranging from video-game makers to tutoring companies, has led to a reduction in the share of domestically listed stocks that are held by foreign institutions. From 6.4% at the start of 2021, it fell to just 4% at the end of 2024.

Even after the recent rally, many of the companies in question still look cheap. Cheapness may be necessary for a resumption of foreign interest, but it is not sufficient. There are issues that make investors cautious, and these would have to be resolved for them to return in good number.

A recovering economy, a truce between the government and business, and a swell of interest in China's technological innovation have begun to revive overseas interest. It is early days, and more is to be done. But the opportunity to seal the deal is there — if they wish to take it.

B. Hong Kong and the Broader Asia-Pacific

The main beneficiary of the market upswing has been Hong Kong-listed high-tech stocks, reflecting Western investors' newfound enthusiasm for Chinese artificial intelligence. Hong Kong's Hang Seng tech index has a price-to-earnings ratio (based on expectations of earnings next year) of around 18, compared with almost 70 at its peak in 2021. China's tech firms are not just markedly cheaper than American tech stocks by the same measure; they are cheaper than American stocks overall.

C. Japan

Japan's Nikkei 225 (+0.7%) eked out a modest gain for the month. The yen was basically flat against the dollar for the month.

Japan's economy has continued to recover moderately, with some sectors showing improvement. Exports and industrial production have remained relatively stable, while corporate profits continue on an improving trend and business sentiment maintains a favourable level.

Conclusion and Outlook

Asian markets are poised to face significant volatility due to the recent imposition of extensive U.S. tariffs on imports from key Asian economies. These tariffs, ranging from 10% to 49%, have already led to notable declines in stock markets across the region.

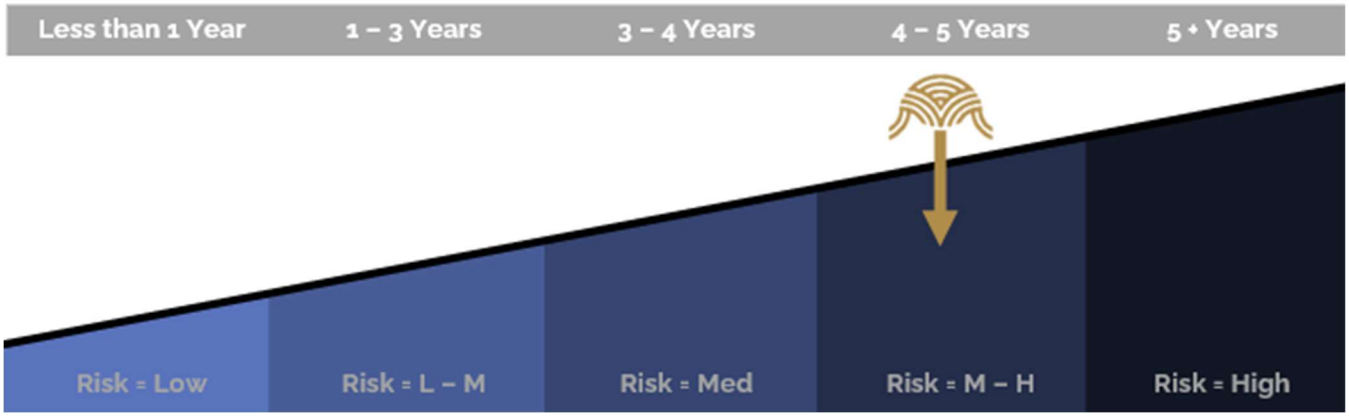

Southeast Asian nations, including Vietnam, Thailand, and Cambodia, are among the most affected, with tariffs of 46%, 36%, and 49% respectively. This development threatens to derail economic growth and efforts to alleviate poverty in these countries.

In contrast, Indian equity markets are expected to be more resilient. Analysts attribute this to India's lower exposure to U.S. tariffs and a domestic economy bolstered by easing monetary policy and fiscal measures.

Looking ahead, the outlook for Asian markets in April 2025 remains uncertain. The potential for retaliatory measures and escalating trade tensions could further impact investor sentiment and economic stability.

.

RISK/REWARD PROFILE

MEDIUM – HIGH RISK

- This portfolio holds more equity exposure than a medium risk portfolio but less than a high-risk portfolio. In turn the expected volatility is higher than a medium risk portfolio, but less than a high-risk portfolio. The probability of losses is higher than that of a medium risk portfolio, but less than a high-risk portfolio and the expected potential long-term investment returns could therefore be higher than a medium risk portfolio.
- The portfolio is exposed to equity as well as default and interest rate risks.
- Therefore, it is suitable for medium to long term investment horizons.

RISK STATISTICS

Annualised Volatility	Fund	Benchmark
Year-on-Year	2.97%	0.21%
Since Inception	3.05%	1.93%

Maximum Drawdown	Fund	Benchmark
Year-on-Year	7.80%	0.57%
Since Inception	10.52%	1.33%

PROJECTED TOTAL EXPENSE RATIO (TER)

Please note: A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, the investment decisions of the investment manager and the TER. The TER and TIC calculations are based upon the portfolio's direct costs for the year ended 31 December 2023.

INVESTMENT MANAGER

Ter'aVerte Fund Management is an authorised CIS Manager – Licence C119024095.

- Additional information, including application forms, annual or quarterly reports can be obtained from Sanlam Trustees International, Mauritius.
- Valuation takes place weekly, and prices can be viewed on Bloomberg (Code: CORCAUS).
- Actual annual performance figures are available to existing investors on request.
- Upon request the Manager will provide the investor with portfolio quarterly investment holdings reports.

DISCLAIMER

Ter'aVerte Fund Management ("TVFM") is a licenced CIS Manager, approved by the Financial Services Commission of Mauritius according to Section 98 of the Securities Act of 2005 and the Financial Services (Consolidated Licensing and Fees) rules of 2008. The licence is subject to the terms and conditions set out in the approval obtained on 1 August 2019. Collective Investment Schemes in securities are generally medium to long term investments. The value of participatory interests may go up or down and past performance is not necessarily an indication of future performance. TVFM does not guarantee the capital or the return of a portfolio. Collective Investments are traded at ruling prices. The fund may not engage in borrowing and scrip lending. A schedule of fees, charges and maximum commissions is available on request from TVFM. TVFM reserves the right to close the portfolio to new investors and reopen certain portfolios from time to time to manage them more efficiently. Additional information, including application forms, annual or quarterly reports can be obtained from TVFM, free of charge. Performance figures quoted for the portfolio are from Bloomberg, as at the date of this minimum disclosure document for a lump sum investment, using NAV-NAV with income reinvested and do not take any upfront manager's charge into account. Income distributions are declared on the ex-dividend date. Actual investment performance will differ based on the initial fees charge applicable, the actual investment date, the date of reinvestment and dividend withholding tax. TVFM retains full legal responsibility for the third party named portfolio. Although reasonable steps have been taken to ensure the validity and accuracy of the information in this document, TVFM does not accept any responsibility for any claim, damages, loss or expense, however it arises, out of or in connection with the information in this document, whether by a client, investor or intermediary. This document should not be seen as an offer to purchase any specific product and is not to be construed as advice or guidance in any form whatsoever. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of TVFM's products. Annualised return is the weighted average compound growth rate over the performance period measured. TVFM does not provide any guarantee either with respect to the capital or the return of a portfolio.
